See the news item on the next page.

$$w - \ln |ap^2 H + e^{ar}| = \ln |y| - \ln |N|$$

$$w = \ln |ap^2 H + e^{ar}| + \ln \left| \frac{y}{N} \right|$$

$$w = \ln |(ap^2 H + e^{ar}) \cdot \frac{y}{N}|$$

$$e^w = (ap^2 H + e^{ar}) \cdot \frac{y}{N}$$

$$e^w \cdot N = (ap^2 H + e^{ar}) \cdot y$$

$$e^w \cdot N = ap^2 Hy + e^{ar} y$$

$$ap^2 Hy = e^w N - e^{ar} y$$

$$\boxed{\text{Happy} = Ne^w - ye^{ar}}$$

My New Year's resolution is to stop hanging out with people who ask me about my New Year's resolutions.

An optimist stays up until midnight to see the new year in. A pessimist stays up to make sure the old year leaves

A New Year's resolution is something that goes in one year and out the other.

This New Year I resolve to be less awesome since that is really the only thing I do in excess.

Yesterday is history, tomorrow is a mystery, but today is a gift. That's why we call it the present.

Let your smile change the world, but don't let the world change your smile
